

DADE, 1700. 5

THE
COUNTRY-MAN'S
KALENDAR,

For the Year of CHRIST, 1700.

Being Bissextile, or LEAP-YEAR.

Containing the daily Motion of the Sun and Moon

with the Aspects of the Planets, and their Conjunctions with
the Moon; And from thence the Inclination of the Air,
and Alteration of Weather, throughout the Year.

Accommodated with other useful Things; As,

- 1 The Sun's Rising and Setting for every Day in the Year.
- 2 A Chronology of several Remarkable Things.
- 3 The Nature of the Four Seasons, of the Year.
- 4 The Eclipses of the Sun and Moon.
- 5 Physical Verses, and Rules for Husbandry and Gardening.
- 6 Observations and Natural Prognosticks for the Weather.
- 7 Of the Judgment of Diseases from the Urine.

And for the Benefit of Country-men,

An Account of several Diseases incident to Cattle, with their Causes, and Cures of them.

Calculated for the Meridian of the middle of
ENGLAND:

And so the more Useful for that, and the Kingdom of IRELAND also.

Printed by W. Onley, for the Company of Stationers, 1700.

Common Notes and Moveable Feasts, 1700.

According to the

English Account.

Foreign Account.

The Use of this Table.

Example. To find the Interest of 70l. for 6 Months; Find 70l. in the first Column, and right against it, in the Column of 6 Months, is 2l. 2s. and so much is the Interest. For the Interest of the same Sum in 9 Months, look for the Interest in 3 Months, which is 1s. 1s. this add to the Interest for 6 months, the Sum is 3l. 3s. the Interest of 70l. in 9 months. Also to find the Interest of 75l. for 3 months: First, look the Interest of 70l. for 3 months, which is 1l. 1s. Likewise the Interest of 5l. for 3 months, is 1s. 6d. this added to 1l. 1s. maketh 2l. 1s. 6d. which is the Interest of 75l. for 3 months.

- Last Quarter the 2 day, 30 min. after 3 in morning.
- New Moon the 10 day, 26 m. after 9 in the morning.
- ◄ First Quarter the 18 day, 30 m. after 2 in the morning.
- Full Moon the 24 day, at 9 at night.
- Last Quarter the last day, 15 m. after 7 at night.

DADE.

A

Prognostication:

In which you may behold the
state of this Present YEAR
of our *LORD GOD*,

1700.

CONTAINING

The Description of the Four Seasons,
the *Eclipses*, the *Passions* of the *Planets*,
and the *Inclination* of the *Air*.

Also *Physical Verses*, and *Short Notes*
and *Rules* for *Husbandry*, for every
Month throughout the Year.

With divers other *Notes* and *Rules* of
Good Consequence, not formerly Published in
this *PROGNOSTICATION*.

By *WILLIAM DADE, Gent.*

LONDON,

Printed by *T. J.* for the Company of
STATIONERS.

Physical VERSSES
AND
Rules for HUSBANDRY.

Of JANUARY.

*If thou be sick, and help wouldest have,
The Council of the Learned crave:
If thou hast health, to keep thee so,
Fly Idleness as deadly Foe.*

January's Instructions for Husbandry.

This Month set all kind of Fruit-Trees, and Quicksets: In the New of the Moon (the wind and weather observed) you may set Pease and Beans, Parsnips and Oats, if the weather prove mild, and the Moon decreasing:

Of FEBRUARY.

*Be choice of Food in any wise,
To keep thee warm also precise:
Beware likewise thou let not Blood,
Except the Learned say 'tis good.*

Februaries Instructions for Husbandry.

This Month set Roses, with all other kind of Plants and Quicksets, sowe Pease and Onions as in the Month before (the weather consider'd) you may now Garden for Sallet-herbs, Pot-herbs, and such like.

Of MARCH.

*Now Bleed, and Bath, if thou desire,
And Purge also (if need require)
All humors do in many breed,
Provide in time before you need:*

March's

March's Instructions.

This Month (in the New of the Moon) Graft, Set Quick-sets, and Vines, Cut your Hedges and Vines already growing. Also you may sowe Onions, Beans, and Oats, and all manner of Garden-herbs.

Of A P R I L.

*Now wholsome Baths thou may'st frequent,
Let Blood also, and not repent;
These are good means thee to defend,
From Griefs, the which on thee attend.*

April's Instructions.

In this Month Pole your Hops, sowe Barley and Artichokes, Bark Trees for Tanners, sowe Hemp and Flax, set Cytrons, Melons and Cucumbers, and furnish and replenish your Gardens with Summer Herbs.

Of M A Y.

*Rise early now this Month of May,
And walk the Fields that be so gay;
From Surfeiting see thou refrain,
Or sure it will procure thy pain.*

May's Instructions.

In the beginning of this Month you may sowe the Seeds of Summer Herbs, which could not endure the cold of the forepassed Months: You may yet sowe Hemp and Flax: Weed your Hop-Gardens, and take away superfluous Branches, and Moss your Gardens.

Of J U N E.

*Drinks New or Sweet, Taste not at all,
For, thereby grows no danger small*

*And thy self such pastime take,
As may in God thee merry make.*

June's Instructions.

In this Month (at the Full of the *Moon*)
Gather your herbs to keep dry for the
whole year, Weed your Corn Fields and Gar-
dens, Set Rosemary and Gilliflowers, Sow
Lettuce, Sheer Sheep, the *Moon* increasing.

Of J U L Y.

*Perfume thy House with Savours sweet,
But such as are for purpose meet ;
Abroad as thou in Streets do'st go,
Defend thy self from stinks also.*

July's Instructions.

In this Month ply your Haying, Fallow your
Lands for Wheat, Pull up Hemp that is ripe,
Get Rue and Wormwood to drive away Fleas
and Moths. Dry Flowers in the shade, and then
Sun them a little for fear of corruption.

Of A U G U S T.

*As burning Heat will thee destroy,
So shivering Cold will thee annoy ;
Let little sleep thee now content,
Purge not, nor Bleed, lest thou repent.*

August's Instructions.

Reap Wheat and Rye, cut down your
Oats; Gather Garden Seeds, Sow Lettuce
and other Winter Herbs in the New of the
Moon. Use moderate Diet, forbear to sleep
presently after Meat, take heed of sudden
cold after great heat.

Of

Of S E P T E M B E R.

Raw fruits (though ripe) may sickness bring,
Unripe much eat, a dangerous thing;
If now a Surfeit thou do'st take,
When others sleep thou must awake.

September's Instructions.

Set Artichoaks, Sow Seeds for Winter herbs, gather Hops, Apples, and other Fruits (which are fit to be gathered) about the Full of the *Moon*, the weather being dry. Cut Quicksets, Sow Wheat and Rye, kill Bees, make Verjuice, Sow Parsnips and Carrets; Remove and Set Slips of Flowers, Set Roses, Strawberries and Barbaries, and remove Trees every New *Moon* till February.

Of O C T O B E R.

Warm Cloths must now provided be,
Also warm Meats are good for thee:
Have good regard thy feet be dry,
Thou shalt avoid much harm thereby.

October's Instructions.

Remove your Plants and Trees in the New of the *Moon*, and about the full of the *Moon* gather such Fruit as you left ungathered the last Month. Set all kind of Nuts and Acorns; and cut your Rose Trees but once in two years, if you intend to have store of Roses.

Of N O V E M B E R.

If Rheums aye molest thy Head,
It is not ill to sweat in Bed.

Feed on good Meats, if Stomach serve,
Else seek for that which doth preserve.

November Instructions.

In the New of the *Moⁿ* remove young Trees, set Crabtree-Stocks to Graft on; and in the Old of the *Moⁿ*, set Pease and Beans, sow Parsnips and Carrets, make Malt, kill Hogs, and make Martimas-Beef.

OF DECEMBER.

Now cold December is come in,
The poor mans back is cloathed thin;
Then Feed and Cloath him as you may,
The Lord will it three-fold repay.

Decembers Instructions.

This Month and the next are best to fell great
Timber in the Old of the *Moon*, to uncover the
Roots of your Fruit-trees, Fallow Land for Bar-
ley, cover Herbs from cold, look well to your
Cattel, take Fowl with Nets or Lime-twigs.

Other *Physical Observations.*

Good to
Let the Sanguine Blood when the *Moon* is
in *Pisces*.
Let the Cholerick Blood when the *Moon*
hath her course in *Cancer* or *Pisces*.
Let the Melancholy Blood, when the
Moon is in *Libra*, *Aquarius*, or *Pisces*.
Let the Phlegmatick Blood, when the
Moon is in *Sagittarius* or *Aquarius*.
Prepare Humours, the *Moon* in *Gemini*,
Libra or *Aquarius*.

Good to purge with { Electuaries,
Pills,
Potions, { The Moon
in } Cancer,
Pisces,
Virgo. Good

To take Vomits, the *Moon* being in *Taurus*, *Virgo*, or the latter part of *Sagitarium*.
To purge the Head by Sneezing, the *Moon* being in *Cancer*, *Leo*, or *Virgo*.
To take Clisters, the *Moon* being in *Aries*, *Cancer*, or *Virgo*.
To stop Fluxes and Rheums, the *Moon* being in *Taurus*, *Virgo*, or *Capricorn*.
To Bathe, when the *Moon* is in *Cancer*, *Libra*, *Aquarius*, or *Pisces*.
To cut the Hair off the Head or Beard, when the *Moon* is in *Libra*, *Sagitarium*, *Aquarius*, or *Pisces*.

OCRA

Other brief Observations of Husbandry.

Set, sow Seeds, and Graft, the *Moon* being in *Taurus*, *Virgo*, or *Capricorn*.
And all kind of Corn in *Cancer*.
Graft in March at the *Moons* increase, she being in *Taurus* or *Capricorn*.
Shear Sheep at the *Moons* increase.
Fell hard Timber from the Full to the Change.
Fell Frith, Coppice, and Fuel, at the First Quarter.
Lib or Geld Cattle, the *Moon* in *Aries*, *Sagitarium*, or *Capricorn*.
Kill Fat Swine for Bacon (the better to keep their Fat in boiling) about the Full Moon.

Natural Prognosticks for the Judgment of Weather.

THE foregoing Rules for the Judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon, and among themselves; These here following, are such as are deduced from Philosophical Aphorisms. Therefore,

1. The resounding of the Sea upon the Shoar, and the murmur of the Winds in the Woods, when the Wind is not stirring abroad, doth shew Wind to follow.
2. The obscuring of the small Stars, foretells Tempests.
3. When Stars seem to shoot, Wind comes from that Quarter.
4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.
5. If the Sky be red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness will soon be dissolved.
6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if red, Wind.
7. If a dark Cloud be at Sun-rising, in which the Sun is soon hid, it will dissolve it, and Rain will soon follow.
8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.

9. If

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will Rain that Night, or the Morning following.

11. If Mists come down from the Hills, or descend from the Sky, and settle in the Valleys, it promiseth fair and hot Weather. Also Mists ascending in the Evening from the Earth or Water, shew a hot day to follow.

12. Water-fowls (as Sea-gulls, More-hens, &c.) when they flock and flie together from the Sea towards the Shore. Also when Land Fowls (as Crows, Swallows, &c.) when they flie from the Lands to the Waters, beating the Waters with their Wings, fore-shew Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain; and the same of the Circles about the Moon.

14. The Trefgil'Grass, against Rain, swells in the Stalk, and standeth more upright.

15. The Wincowpipe (growing in Stubble fields) if you find it open in the Morning, be sure of a fair Day to follow.

16. Aches, Hurts, and Corns, do engrieve against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident Signs of Rain to follow.

18. Solid Bodies, as Stone and Wainscot, when they sweat, doth fore-shew Rain.

*Natural Prognosticks of Pestilential, and
Unwholsome Years.*

f. **W**hen there are great number of Frogs, Flies, Locusts, &c. For these Creatures being engendred of Putrefaction, shew a general disposition of the Year, and constitution of the Air to putrefaction.

2. When Worms are found in Oak-Apples.
3. Great and early heats in the Spring (and chiefly in *May*) without Winds.
4. Great drought in Summer, continuing to the end of *August*, portend a Pestilential Summer the next year.
5. The Small Pox, Purples, and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.
6. A dry *March* and a dry *May* portend a wholesome Summer, if there be a showring *April* between.

Signs of a Sound and Pure Air.

1. A Sound and Pure Air is made hot presently after the Sun-rising, and is made cold immediately after his setting.
2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and lightsome, and when the North-wind bloweth.
3. Where there are Easterly Winds in the Mornings.

Signs of Corrupt and Infectious Air.

1. A Corrupt and Infectious Air is made by the often blowing of the South, or South-East Winds.

Winds: or by the West, or South-West Wind
in the Evening.

2. When the Air is cold long after Sun-set.
- 3: When the Air is long hot after Sun setting.
4. When the Air is long close, cloudy, or thick.

How to judge of Diseases by the Urine.

1. Urine fat and troubled, betokens a burning Fever of choler: Or red and thick all over, with a black Circle, sheweth sickness all over the Body.

Urine white and thin, and little in quantity, sheweth cold in the Body.

Urine clear, with a black Circle, sheweth the sick Person hath the Ptisick.

Urine red and thin, with a bright Circle, sheweth a bad Stomach.

Urine thin, and greenish above, sheweth a cold Complexion; if blew in casting, 'tis the Ptisick.

Urine thin, if it shew black above, betokens great los of Nature.

Urine thick and troubled like Horse-piss, signifies the Head-ach:

Urine fat in the bottom, white in the middle, and red above, sheweth a Quartan Fever.

Urine fat like Flesh, with dregs in the bottom like shadowing, sheweth the Dropsie by cold: But if it be wheyie above, clear in the middle, and shadowing beneath, it sheweth a hot Dropsie.

Urine with black dregs in the bottom, like goblets of Coles, sheweth Worms.

26. Urine with black Contents (as moaths) in
the middle, shew's an Impostume.

27. Urine with Contents like shavings of
Parchment in the bottom, shewing stopping
of the Reins and Pipes of the Liver.

28. Urine black and green, with long white
Contents, signifies the Palse.

29. Urine that hath Grains under the Circle,
sheweth the Stomach is full of Worms, and
also burning of the Heart.

30. Urine foul above, sheweth heat in the
Heart, Lungs, and Spleen.

31. Urine with black Contents in the bottom
shew's Costiveness.

32. Urine that is long lasting, betokens biting
in the Body, and great Rheume.

33. Urine thick, little in quantity, and high
coloured, shew's great burning in the Body.

34. Urine Frothy, clear and a little Red, shew's
pain in the right side.

35. Urine Frothy, sheweth wind and pain un-
der the left side.

36. Urine very Red, sheweth an Impostume
on the Liver.

37. Urine Red as burn'd Gold (if it be Hy-
dropick) betokens Death.

38. Urine in a hot Feaver, one part Red, another
part Black, another part Green, and the other Blue, betokens Death.

39. Urine in hot axis, black, and little in quan-
tity, and stinking, betokens Death.

40. Urine all coloured as Lead, sheweth a
prolonging of Death.

26. Urine dark, and clear beneath, betokeneth Death.

27. Urine that spineth raw and white (if the skum in the bottom shines not) sheweth death.

28. Urine thin in substance, fleeting above like a dark Skie, betokens Death.

29. Urine dirty, stinking, and a dark Skie, betokens Death.

30. Urine like Water, with a dark Skie, in a Fever, sheweth Death.

31. Urine with dregs in the bottom, mingled like Blood, sheweth Death.

32. Urine black and thin (if the sick do loath when he goes to the Stool, and speaks overthwart, or understands not aright) if his sickness goeth not from him, it signifieth Death.

A Description of the Magnitudes, Motions, and Distances of the Seven Planets.

Argol, a laborious and learned Astronomer, giveth this account of the Planets Motions and Distances, to wit:

The Sun is greater than	Saturn, Nine times.
	Jupiter, Fourteen times.
	Mars, Two thousand five hundred thirty five times.
	Venus, Twelve hundred and seventy times.
	Mercury, Three thousand seven hundred and five times.
	The Moon, Ten thousand times.
	The Earth, One hundred ninety six times.

Satyrn

Saturn is
greater than

Jupiter is
greater than

Venus is twice as big as Mars, and three times as big as Mercury.

Mars contains Mercury once and an half

The Moon is
greater than

The Earth
Saturn
Jupiter
Mars
The Sun
The Moon

Saturn is
distant from

Jupiter, one half.

Mars, Two times.

Venus, Two hundred eighty times.

Mercury, Four hundred and eighteen times.

The Moon, One thousand one hundred twenty two times.

The Earth, Twelve times.

Mars, One hundred eighty two times.

Venus, Eighty four times.

Mercury, Two hundred sixty four times.

The Moon, Seven hundred and Fourteen times.

The Earth, Fourteen times.

Mars, Thirteen times.

Venus, Six times.

Mercury, Nineteen times.

is distant from the Firmament

49150720
127864480
35425120
47490640
44720000
48958080

Jupiter — 23138640

Mars — 29316440

The Sun — 3193352

The Moon — 36171600

Jupiter

Miles.

Jupiter is distant from The Sun — 9294880 Miles.
The Moon — 13532960

Mars is distant from The Sun — 1572080 Miles.
The Moon — 6310160

The Sun is distant from the Moon 4238080, that is, Four Millions, Two hundred thirty eight thousand, and eighty Miles.

Hac incredibilia videntur tantum iste, qui Mathematicis demonstrationibus non assuerunt, &c.

Of the Properties, and Natural Effects of the Seven Planets.

Saturn.

Saturn being well posited, is like a grave Counsellor, & a Man of authority thinking of great matters, a lover of Secrets, Diligent, Solitary, Covetous, Studious and a Zelotype—Being evil affected, he is an Abject, a Pick-thank, fearful, given to Solitariness, Sad, Stubborn, Ill-willy, Deceitful, Sloathful, Dull, a Lyar—By nature he hath relation to a Husbandmen, Masons, Blacksmiths, Diggers in the Earth, Tanners, & the like.

Jupiter.

Jupiter is said so be the greater Fortune, & of Nature is benevolent; Being well situate, he maketh men honest, prone to good duties, pious, magnanimous, vericundious, modest, wise, diligent, liberal & yet careful of their own—Being evil disposed, he is more prodigal & stout—He signifies, Bishops, Church-Governors, Lawyers, Judges, Governours of Towns and Cities, and Ecclesiastical Persons.

Mars.

Mars.

Mars being well affected, is valiant, generous, hasty, given to War, fearing no danger, impatient of servitude, and injuries, not respecting riches—But being badly seated, he is irreful, cruel, prodigal, a Tyrant, a Murtherer, and the author of discords and seditions—He hath relation to Soldiers, Surgeons, Turks, Fire-works, &c.

Sol.

He is Magnanimous, Valiant, Provident, a giver of long life, and a healthful body—He maketh Men wise, famous, desirous of honours, having signification of Kings, Princes, Dukes, Marquesses, Earls and Potentates.

Venus.

Venus being well situate, maketh men fair spoken, pleasant, fair, delicate in gesture, given to pleasures, sociable, merciful, &c—But being ill affected, she is effeminate, timerous, a lover of Maids, sluggish, lustful, a Zelotype, and given to idleness.

Mercury.

Mercury being well seated, causeth a sharp wit, maketh men studious, and capable of learning—Being ill seated, he is subtile, crafty, malicious, and a Lyar—Of Persons, he signifieth Philosophers, Poets, Mathematicians, Scriveners, Merchants, and the like.

Luna.

The *Moon* maketh Men unconstant, fearful, prodigal, studious of Histories, and given to Navigation and Planting—She signifies Embassadors, Legates, Queens, Ladies, also Common People, Fishers, Watermen, and such like.

Of the Four Quarters of the
YEAR 1700.

Of WINTER.

WINTER Quarter (after the *Astronomers Account*) began the 11th of December, at which time the Sun entered into *Capricorn* the last year, and continues till the Tenth of March this year. So that always the first-part of the Astronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other.) At which time was the shortest day of the year, by reason of the Sun's greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and, in this Quarter the inward parts of Man are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sickneses whereunto this Quarter is most inclined, are *Rheums, Gouts, Pustules, Sore Eyes, Melancholy, Coughs, Catarrhs, Sciastes, Falling-Sickness*, Diseases proceeding of Rot-

teness and *Corrupt Humors*; with divers kind
of *Infirmities* incident among Women.

Of the S P R I N G.

THe Spring-time (being the most pleasant
and Wholsom Season of the Four) taketh
its beginning on the Tenth of *March*, when
the Sun entreth into the Equinoctial point
Aries, making the days and nights of equal
length; which Quarter endeth the 10th of
June, when the Sun entreth into *Cancer*.

This season is naturally hot and moist, and is
of the Sanguine complexion, being the most
temperate and healthful time of the year, and
is therefore accounted the fittest time to cure
diseased Bodies in, and to restore health again
in those in whom formerly it hath been do-
cayed by any kind of evacuation.

The Infirmities of this Quarter are *Melan-
choly*, *Madness*, the *Falling Sickness*, *Bleeding*
at the *Nose*, *Hoarsness*, *Coughs*, *Itch*, *Scabs*,
many *Ulcers*, and small *Apostumes*, the *Gout*, and
Pain in the Joints, *Pleurishes*, *Dropsties*, *Pestilence*,
Agues, *Shortness of Breath*, *Faintings*, *Pain in
the Head*, *Eyes*, and *Stomach*, *Rotten Fevers*,
and other *Strange Diseases*.

Of S U M M E R.

Summer (accounted the Third part of the
Year *Astronomical*) taketh its beginning
at the time of the Suns entrance into the first
point of the Solstitial Sign *Cancer*, which is the
Tenth

Tenth of June, at which time he makes his greatest declination from the Equinoctial towards the North, and causeth the longest day and shortest night in the year ; and so Summer holdeth on till the 12th of September following.

In this Quarter the Stomach cannot digest such hard Meats as it will in the Winter season, for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in Winter.

The Sickneses at this time are divers, as *Burning Agues, Pleurises, Frenzies, Hot Apostumes, Divers pains in the Head, Sundry Inflammations, and New Infirmities*, proceeding especially of *Hot Cholerick Humors*, wherewith many will be sore molested.

Of AUTUMN or HARVEST.

Autumn or Harvest (being the Fourth, or last Quarter of the Year) begins upon the 12th of September, the Sun then making his entrance into the second Equinoctial Sign *Libra*, working the same effect that he did at his entring into *Aries*, that is, making the days and nights of equal length, rising at six in the morning, and setting at six at night ; and this Quarter doth last until the Eleventh of December following.

The quality of this Season is naturally cold & dry, yet by reason of its mutability, 'tis the most unwholesome ; by means whereof, it is more subject to sickness than any other: for the dregs of all diseases, of the former parts of the year, will now break forth and be seen. B 2 The

The Diseases of this Quarter are like to be many and dangerous, as *Black Jaundices*, *Megrims*, the *Falling Sickness*, *Cephalinations in the Spleen*, *Difficulty of Breathing*, *Convulsion Fis*, *Dropfis*, *Sciatica's*, *Biles*, *Tooth-ach*, and many more: From which good Lord deliver us.

Of the ECLIPSES this YEAR 1700.

There will be but One Eclipse visible in England this Year; and that will be of the Moon, on the 23th. day of February, and will be visible before the Sun rises; for at 15 min. after 7 in the morning she will be totally Eclipsed.

Of several Maladies, Diseases, and other Distempers incident to Horses and other Cattle, with their Causes and Cures.

I. For a Surfeit in a Horse.

Take Three Quarts of Strong Beer, One handful of Wormwood, One handful of Celendine, and One handful of Herbgrace; chop them and boyl them in the Beer, until two parts of three be boyled away: Then squeeze and strain the Liquor from the Herbs, and put therein a Spoonfull of Honey, and two Ounces

Ounces of Treacle, with a Lump of sweet Butter. — Give it him fasting in the morning, with Exercise after it; and when you bring him home, cloth and litter him up warm: And two or three hours after give him a warm Marsh, and white Waret.

II. For the Gravelling of a Horse in the Foot.

Cut the Hoof till you can find the sore: Then take One Ounce of Virgins Wax, a quarter of an Ounce of Rozin, and a quarter of an Ounce of Deer-fuet; half an Ounce of Boors Grease, and One Head of Sengreen: Bruise all these together in a Mortar, and then set it over the Fire till it be melted: Then apply it to the Foot grieved, and spare not to Travel him, for it will Cure him the better.

III. To Cure Scabs on Beasts.

Take the Beasts own Water, Butter, Salt, White-wine Vinegar, Sallad Oyle, and a little Brimstone: Blend all these together, and rub the same on the Scabby place, and it will perfectly heal it.

IV. A Bathe very good for broken Bones.

Take One Gallon of standing Lye, Two handfuls of Knot-Grass, Two handfuls of Plantine, One handful of Cumfery, and One handful of Wormwood: Boyle all these very well in the Lye; and whilst it is warm Bathe the Member afflicted therewith; and give him also, at the same time Buds of Elder gathered in March, and boyle them in Running Water, and

and give it him for several Mornings together in haif a hom full of Salled Oyle and Vinegar, and it will much prevail in knitting of the Bones.

V. How to prevent Diseases in a Horse the whole year.

The First day of April open a Vein in the Neck, and if the Blood be good, take the less, but if it be bad take the more; and from that day until the first day of May, give him this which I shall prescribe, and let him have it Morning and Evening, during the whole Month of April (which is before his turning out to Grass) which shall be much about the middle of May, and let him have the same the whole Month of October, like as you should do in April, after you have taken him home from Grass about Bartholomew-tide.

That which I shall prescribe, is this:

Take a Bushel of Old Rye, sweet and clean from all filth, and put it in a clean Iron Pot dry without Water; put it over the fire, and keep the Rye continually stirring to the bottom until it be parched, that it become black, hard, and dry: Then take it from the Fire, and put it into some clean Vessel and when it is cold, keep it stopped close for your use.

When you use it, Take two or three handfuls of it, and beat it into fine Powder, and mingle it among his Proventer at every Watering, Morning and Evening, or at other times when you give him Oats. Do this the two Months of April and October; for in these two Months the Blood turneth and altereth as we alter his Diet; from hard and dry Meat to Grass, and so likewise from Grass to dry Meat: For this Rye thus parched, dried and ordered, doth refine the Blood and coole the Liver, and purgeth the Spleen; so that the whole Body is thereby better cured and freed from all such bad and unnatural humours, which would otherwise make the Body incline to sundry Diseases, which this Rye will prevent.

VI. To Cure a new Wound or Hurt.

Take a quarter of a pound of the Powder of Bole-armonick and put it into White-wine Vinegar, and boyle it well upon the Fire with a piece of Butter put into it: And when it

com

comes off the Fire (before it be cold) wash the Wound once every day, and it will soon be well.

Otherwise.

To heal a Gangreen or Wound: Take Lint-seed Oyle, and put into it, it being clean washed, and washed first with Butter and Vinegar — Also, Traine Oyle, and the Powder of Verdigrease melted together, will heal and skin any Wound quickly.

VII. For the Staggers and Yellows in a Horse.

Give him a handful of bruised Hemp Seed in a Pint of White-wine, but first let him Blood, and then Rige him till he be warm, and presently set him up, giving him a warm Marsh.

VIII. For the Plague in the Guts.

First, Let him blood in the Mouth: Then take of a Horse's Skull dried to Powder, half an Ounce, a handful of Bay Salt, and a handful of Rue dried to Powder, and brew them together in three Pints of Ale; make it blood warm, and grench the Horse therewith, and it will Cure him.

IX. For the Scratches.

Beat Green Copperas, and mix it with black Soap — Or, take Barrows Grease and Brimstone with Butter mixed together, and apply it as hot as you can without Scalding.

X. For a Sprain in the Postern Joynt.

Take a Quart of Brine, and boyle it till the Skum rise, then strain it, and put thereto a handful of Tansie, a handful of Mallows, three Spoonfuls of Honey, and four Ounces of Sheeps Suet; boyle them till the Herbs be well sodden: Then apply it very hot to the place grieved, and bind a Cloth over it.

XI. A Receipt for Ointment.

Take common Honey, and Verdigrise finely powdered, of each as much as will suffice; boyle them together till they are well: This will heal up any old or green Wound in a short time.

Amber

Take Turpentine, black Soap, Hogs Grease, Green-Tre and Pitch, a like quantity: mix them all together, and apply it warm, either Plasterwise or Tentwise.

XII. *A Medicine to kill the Mainge in a Horse.*

Take a pound of black Soap, a Pottle of Mustard, Four pennywörth of Brimstone, in fine Powder, Three penn-worth of Quick Silver well killed with fresh Grease; stir all these together in an Earthen Vessel, till the Grease and other things be molten, with labour, and without Fire, and therewith anoint the Mainge place, but first let him blood: Then after two days, wash it with the Water that young Broom or Arsmannick Herb hath been boyled in, and small chopped and mixed with the Powder of Soot, and let these seeth well together, and this will help him with once anointing, and twice washing.
